

Caro Zamani

UX Engineer & Product Designer

Tehran, Iran (Remote-friendly) | carozamani75@gmail.com | +98 912 932 8672 | linkedin.com/in/carozamani

Summary

Product Designer and UX Engineer with hands-on experience owning the full product design cycle end-to-end: user research, wireframing, high-fidelity UI/UX design, and design systems in Figma, followed by pixel-perfect implementation in React and Next.js. Comfortable working across the stack when needed — building and consuming REST APIs with Express.js and MongoDB — which lets me design realistic, technically-grounded solutions and collaborate closely with engineering teams without a hand-off gap. Currently pursuing an MSc in Cognitive Science to deepen research-driven design decisions.

Skills

Product Design & UX: User Research, Wireframing, Prototyping, Interaction Design, Design Systems, Usability Testing, Information Architecture, Figma

Frontend Engineering: React.js, Next.js, TypeScript, JavaScript, HTML/CSS, Tailwind CSS

Backend & Data: Express.js, Node.js, MongoDB, REST APIs

Tools & Practices: Git/GitHub, Systems Design, Agile Collaboration, Cross-functional Stakeholder Communication

Experience

Product Engineer — JabeDee

Full-time · Remote · Sep 2026 – Present

- Joined as a Product Engineer covering product design and React/TypeScript frontend implementation.

UX Engineer — Karvita

Full-time · Tehran, Iran (Remote) · Jun 2026 – Sep 2026 (4 mos)

- Owned the full product design and frontend development cycle end-to-end, from business requirements to shipped UI.
- Defined product features and information architecture based on business requirements.
- Designed wireframes, high-fidelity UI/UX mockups, and reusable design-system components in Figma.
- Presented and iterated designs with stakeholders through to approval.
- Implemented approved designs in React — pixel-perfect and fully responsive.
- Integrated the frontend with backend APIs and handled end-to-end data flow.

UX Engineer — Novan

Remote · Sep 2025 – Apr 2026 (8 mos)

- Designed and built UI prototypes for new product features, working closely between design and engineering.
- Conducted UX research and evaluation to improve user flows.
- Collaborated with product and engineering teams to translate designs into actionable, implementable solutions.
- Maintained consistency of the design system across the product.

React Developer — ArcGIS Mastery

Remote · Dec 2023 – May 2024 (6 mos)

- Developed the frontend of an online GIS education platform using React and TypeScript.
- Built and maintained UI components for course content, user dashboards, and learning flows.
- Collaborated remotely, freelance, on a US-based e-learning product.

Projects

Music Player — Open Source (UI/UX Designer)

Flutter · Sep 2025

- Led full visual design and UX for a free, ad-free Android music player published on Cafe Bazaar and Myket.
- Designed interface layout, dark/light theme system, Persian RTL support, playlist flows, and all interaction states.

Voider — Open Source Snake Game (UI/UX Designer)

React, TypeScript, Vite · May – Jun 2025

- Designed the game interface, visual system, and overall UX — layout, color palette, game states, and interactions — in a cross-functional team with React/Vite engineers implementing the frontend.

Education

MSc, Cognitive Science — Institute for Cognitive Science Studies

2025 – Present

BSc, Computer Software Engineering — Islamic Azad University

2018 – 2020

Certifications

- User Experience Research and Design Specialization — University of Michigan (Coursera), 2026
- bootcamp React.js — Daneshkar Group, 2025
- Project-Oriented Course in Front-End Web Development — Quera, 2024 (HTML/CSS, Tailwind CSS)
- SEO Expert — Daneshjooyar, 2022
